CMC 202

<div dir="rtl">

على كل طالب اختيار موضوع بحثي واحد مما يلي

الموضوع البحثي الاول

</div>

-State and discusses the stresses (principal stresses) in 2D plane and inclined plane analytical and graphical by using two different examples.

- What is the shear stresses , shear flow and shear center by giving an examples.

<div dir="rtl">

الموضوع البحثي الثاني

</div>

-Explain the how's to using the Mor~s circle to calculate the principal Axes and the direction

By giving an example.

-discuss the methods of solving the normal stresses.

<div dir="rtl">

مع امنياتي بالنجاح والتوفيق
